

OFFICIAL CERTIFICATION FOR SHERRY EDUCATORS

OBJECTIVE

The objective of the Consejo Regulador is to promote and support the activity of well-trained educators on Sherry wines, assuring a high level of performance in their respective educational programs on Sherry wines.

MECHANICS

In order to recognise a specially high level of quality in the services provided by wine educators in relation to Sherry wines, the Consejo Regulador has developed an official certification for Sherry educators. In practical terms, the professionals awarded with this certification will become an extension of the Sherry Academy –the Consejo’s educational arm– in the respective markets.

The candidates to the title of “Official Sherry Educator” shall be:

- professionals of wine education: lecturers on wine knowledge and appreciation who perform this task on a regular basis,
- educators with a deep product knowledge on Sherry wines, in accordance with the level of requirements established by the Consejo Regulador, and
- with educational methods and materials that meet the standards of the Consejo’s Sherry Academy.

1. SEMINAR FOR SHERRY EDUCATORS

On a yearly basis, the Consejo Regulador will organise an in-depth two-day seminar in Jerez, including theoretical and practical sessions at a very high level. At the end of the program there will be an official examination for all attendees. Those candidates who pass the different parts of the exam will receive the title of OFICIAL SHERRY EDUCATOR and the corresponding certification.

Applications for the seminar shall be sent to the attention of the Consejo Regulador's "Aula de Formación del Vino de Jerez" in the attached form, which must be completely filled by the candidates.

2. APPROVAL OF EDUCATIONAL METHODS AND MATERIALS.

Apart from the qualification of the candidate's skills through the Consejo's examination, the certification of OFFICIAL SHERRY EDUCATOR requires the approval of the methods and materials used by the candidates: texts and other materials (see point 4 in next chapter).
